Beta Cap

Designed for the application of transfers to all types of headwear, the Beta Cap features our renowned Digital Controller for the accurate pre-selection of both time and temperature.

The Position of the base platern is adjustable, to suit different styles of cap.

The Beta Cap Press is a manually operated heat press for printing caps and similar small items. This simple robust machine is powered by a micro-processor for control of both heat and dwell accuracy and ease of operation and requires minimal operating space.

The work area of the Beta Cap Press is 15 x 9 cms (6 x 3.6 ins).

The Beta Cap Press is produced in two versions, nominally 230-240 Volts AC for the `European` market and nominally 120 volts AC for the `American` market.
